Testimonials

- from the Golf Course

Don't believe us....

*Listen to what your peers
have to say about the COLD-
fire treatment*

I must admit that I was somewhat skeptical at first as the golf world is rife with performance enhancing claims, however I can truly say that COLDfire delivered what it promised. There is no doubt I am hitting my drives some 10 to 15 meters further than before, and I am also hitting more fairways., I have already recommended your process to other of my golfing colleagues and am happy to add my testimonial to what I am sure is a growing list of happy customers.

Mont Albert North**

I myself have gained between 10 to 15 meters off the tee and I am hitting it straighter. A lot of my friends agree I am hitting it longer and straighter. At first I was a bit apprehensive about telling them, just in case it did not work. Eventually they started noticing I was hitting it longer and they wanted to know what I was doing differently. So I had to tell them about "COLDfire" and I passed a few of your advertising brochures to them, even though it might cost me, when they start playing me for the money I have taken from them.

Thank you for helping me enjoy my golf, and I wish you more success in the future

**Geoff Gumm
Highett**

I have to admit that I am a skeptic, however I am always on the lookout for any advantage I can get. As soon as I heard about this I had to give it a try. I also have to admit the difference the COLDfire treatment has made to my clubs has certainly improved my game, noticeably the performance

With my first test of the driver I was pleasantly surprised to say the least. My stock bad shot is a block slice that will easily finish in the next fairway. It is the type of shot that you don't even have to look up to see the result once you've felt it off the clubface, you know where it's gone. It surprises me now that these shots are merely a gentle fade. It makes it hard to miss a fairway now. Even mishits get more than reasonable length. On solid Tee Shots I get an extra 10-20 yards. On mishits I seem to hit it normal length (before COLDfire) I now get better feel and my desired ball flight, which is a lower more piercing trajectory.

Whilst playing last week with a few friends they were surprised as well as annoyed that I consistently knocked it past them all day after having been he "Short Hitter" for many years. Your COLDfire process was firmly proven to me when all 3 of my mates (2,2,&4 handicap) tried my Driver. They all suddenly hit it 20 yards further and dead straight. The most memorable comment from one of them was "I can't believe I still hit that one long and straight, it felt like I necked it and sliced the hell out of it".

It will be impossible for me to make a comment in a nutshell that will do you justice. All I can say is I'm sold! It was certainly worth the investment and...I have sent my Titleist backup driver and fairway wood to get COLDfire treated as well. You will also be receiving a few more from my recommendation including 2 from friends in England.

TECHNOLOGY FOCUS INFORMATION

Since I have had my driver and 3 wood treated with the COLDfire process, I have noticed the extra carry of the ball during its flight of the tee and fairway this is noticeably now in winter when there is less roll. I have also noticed on windy days the ball deviates less, as the ball tends to bore through the wind and thus a little more distance especially into the wind.

James H. Richardson

Moe

I believe that the treatment that you have done to my club makes the ball fly straighter and lower than ever before. I seem to hit more and more fairways, with my mishit shots being a lot closer to the target. I love what you have done to my driver, and I can't wait to get it done to the rest of my clubs.

Ballarat Golf

As a 14 handicapper and at 49 years of age I have been looking for a way to reach single figures. After reading about your technique I decided to have my driver done.

After a few months my handicap is down to 11. it is much easier to hit second shots from the fairway. I am really pleased with the result. It has given me new confidence to use my driver almost all the time, I would recommend the COLDfire process to all golfers.

Trevor Male

Cranbourne

I had been trying for six years to win a Medal and this year I finally succeeded after having my clubs COLDfire treated. My partners have also remarked on the marked improvement in my game.

Trish. J

Since having my clubs treated by Coldfire I definitely hit straighter and have a far greater consistency with the distance of my shots. I've played well on other courses and have had no bad scores.

Steve Mitchell

Bayswater

A short note to tell you how thrilled I am with my Coldfired Driver. The process was a gift voucher for my birthday and it is a wonderful present. When hit properly the driver goes meters further and makes a lovely sound. I was concerned that miss-hit shots would get into trouble

- but they don't. Congratulations and good luck. I will be bringing some irons next week.
